DETAILED ACTION

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 108-167 been renumbered 111-170. Restriction is required under 35 U.S.C. 121 and 372. It is noted that claim 108-111 are still pending, but it is assumed that applicants intended to cancel these claims. Applicants need to positively cancel these claims if they so choose.

Election/Restrictions

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 111-132, and 160-167, drawn to methods for serving beer or cider.

Group II, claim(s) 133--134, 141-147, 168 and 170, drawn to beer or cider.

Group III, claim(s) 135-140, and 169 drawn to a method of keeping an alcoholic beverage cool.

Group IV, claim(s) 148-159, drawn to apparatuses for supplying draught beer.

Art Unit: 1761

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the separate groups do not contain the single general inventive concepts of treating a beverage with ultrasound, using ice nucleation means, using bubble nucleation means, providing a head on a beverage, forming ice or heat exchange and/or valve means..

Election of Species

This application also contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Serving beer subjected to the effects of ultrasound signals, ice nucleation means or gas nucleation means. If applicants elect Group I from the restriction above, they must then elect one species as set forth immediately above.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1761

The following claim(s) are generic: 111, and 121-127.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: From the specification it appears that the technical feature is the means by which the beverage is treated.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
